MITRE 10

AQUAMAX™

Timber Stain

AQUAMAX is applied as a water based product and when the water evaporates, linseed oil is released to penetrate into the timber, forming a low gloss, stained finish. The film dries overnight and continues hardening for several days.

Exterior/Interior

UV absorbing
lightfast pigments

Brush

Roller

Airless Spray

6-8 sqm/litre

Coverage

Touch dry 90 min

Recoat 90 min

Water clean up
