Exclusive to

MITRE 10

DECKMAX™

Decking Stain

A leading edge oleoresinous/ acrylic tribrid technology has been used to formulate this decking stain. This binder technology ensures DECKMAX stain has the combined properties of penetration of the timber, film hardness to protect walk-on surfaces & shorter touch dry time.

Exterior

Mould inhibitors

Brush

Applicator

6-8 sqm/litre per coat
Coverage

UV absorbing lightfast pigments

Water clean up

Other surfaces
Recoat overnight

New Pine
Recoat min 2 hr
