

AQUAMAX™

TIMBER STAIN

Water based, linseed oil, penetrating timber stain with strong, solid colours. The linseed oil soaks in and protects the timber while providing excellent performance and durability.

For use on fences & gates, beams, trellis & pergolas.

KEY FEATURES:

- Strong solid colours
- Linseed oil
- Quick recoat time
- Can be used over other weathered stains

UNIQUE SELLING POINTS:

- High opacity
- Excellent durability (5-8 years)
- Test pots

DRY TIME 90 MIN
RECOAT TIME 90 MIN

COVERAGE
6-8 SQM/L

WATER & SOAP
CLEAN-UP

Exclusive to Mitre 10

AQUAMAX™

BEFORE

AFTER

PREPARATION IS IMPORTANT:

- Ensure the timber surface is clean and free of mould and moss, dirt and contaminants.
- Treat mould and moss with a MASTERMAX fungicidal cleaner or a proprietary fungicidal product.
- Use PREPMAX Timber Clean & Prep for a more aggressive preparation and leave for at least 2 weeks. Then remove dead material by scrubbing and/or a low-medium pressure water blasting. Note: Heavy water blasting is not recommended as it can “fluff” up the timber surface.

Q: Gloss variation?

A: Due to variations of absorption in some timbers grains, initial gloss patterns maybe evident, but these dimmish with time.

Q: On decks?

A: Whilst we know some customers have used AQUAMAX on decks, due to the slow curing time, we don't recommend it. We recommend either DECKMAX Decking Stain or TIMBERMAX Deck paint.
